Assignment #2

2021-04-30

Instructions:

Step 1: Open the rmarkdown file labeled assign2.rmd @ assignment2

Step 2: Revise line #3 with your name. *(. . . this is the yaml header in an rmarkdown file. We will discuss this more later on.)*

- The rmarkdown file you will be knitting will output into an htlm_document.

Step 3: Address the questions providing your responses in each empty code chunk.

- Provide a response in each each question.
- Each response should be completed in the associated code chunk nested below the question.

Step 4: When you have addressed all the questions providing a response in each of the empty codie chunks you can knit the file by clicking on the Knit button.

Note, a html document will generate in your working directory.

Step 5: Submit the generated html file to the instructor.
